About me:

With high ambitions to become a great developer where I find joy in backend as well as frontend and deployments. I am looking for new challenges in new exciting companies

Work:

2021-Now

G-Loot Global Esports AB

- Developed and led integration project of a new microservice that is tied to tournaments which is one of the more complex projects in the organization.
- Led projekt och divided responsibility to frontend developers in order to investigate och analyze how to improve performance för BFF (Backend for Frontend)
- Participated in intensive 8 weeks development crunch in order to deliver a revamped version of company's main customer facing product.
- Actively been part of intensive on-call duties by use of Graphana and Google Cloud logs and Github Actions för releases.
- Cross functional team of 11 people: Backend, Frontend, UI-designer, UX-designer, BI, Monetization och en Team ledare.

Focus:

- Java 17 • Spring Boot • PostgreSQL • Kafka • Swagger • JUnit • Github Actions • Github Code Review • Google Cloud • Kubernetes • Graphana

2017-2021

Web Manuals International AB

- Back-end focused roll and fullstack. Developed and deployed microservice for import of compliance regulations. Migrated legacy webapplikation to Angular 7-11 SPA front-end och Java REST APIs.
- Safety Officer, representative for the company work environment which includes handling inputs from all teams.

Education:
